

Holy Name Teacher Observation and Formal Evaluation

Teacher: Blaise Badynee

Date: 2/9/2015

Grade/Subject: 5th Grade Spanish

Classroom Environment: The classroom environment was organized and set up in a manner in which was conducive to student learning.

Observation:

It is through my observation that Ms. Badynee prepares each lesson in advance to ensure the most effective use of the time allotted per grade level. It is with Ms. Badynee's organizational skills and consistency that the students arrive and are on task for the daily lesson.

Ms. Badynee's technique for delivery is highly effective and gains the student's attention immediately. When observing Ms. Badynee she not only introduced the material verbally but the students sang songs, watched a music video and played a game to grasp the concepts. Ms. Badynee's various techniques kept the students engaged and maximized student comprehension.

As Ms. Badynee delivered the lesson to the students, she clearly stated the instructions and waited to ensure full student comprehension. While the activity was being done, she walked around the tables to make sure that students were on task and questions were addressed as needed.

Ms. Badynee made great use of the technology in her classroom. Instruction was provided with the use of the Promethean Board and computer.

Ms. Badynee is very patient and offers supportive statements to the students to reward them for positive behavior. Ms. Badynee's enthusiasm for Spanish clearly builds excitement in her students.
